Sir,

I received an email from you about some omissions on my Form 1. It was inadvertently, automatically filed in Outlook and I didn't see it until today. I apologize.

I spoke to Jill in your office who said that I neglected to add the state and district that I was running in. That is corrected in the attachment Form 1 revision attached.

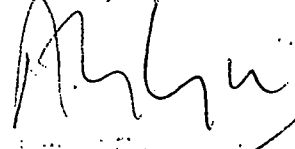

I was unable to add a depository bank account as requested, as there wasn't one. I did not receive any donations, but funded the race myself from my personal bank account. It was not until just before the primary that I spent slightly more than \$5,000 prompting the Form 1 and other filings.

The last of the expenditures were through "Bill Me Later"/PayPal that offer temporary interest free loans. These were used and are being paid off. They were reported in Form 3 and will continue until the official campaign termination.

Jill said to leave the bank information blank and not use the PayPal donation account as the bank or depository of record.

If you need more information, as the leveneforcongresshawaii.com domain is expiring in a few days, please correspond via mail or just call my cell phone above.

Thank you

Allan Levene
